You are here: IntelliDealer Menus > Product Support > Equipment Product Support > Equipment Profile: Listing

Equipment Listing

Use the **Equipment Listing** screen to search for equipment, add equipment to an invoice and create a new equipment profile.

To access the **Equipment Listing** screen, navigate to:

- **Product Support > Equipment > Equipment Profile** - for read/write access.
- **Management Central > Equipment > Equipment Profile** - for read-only access.

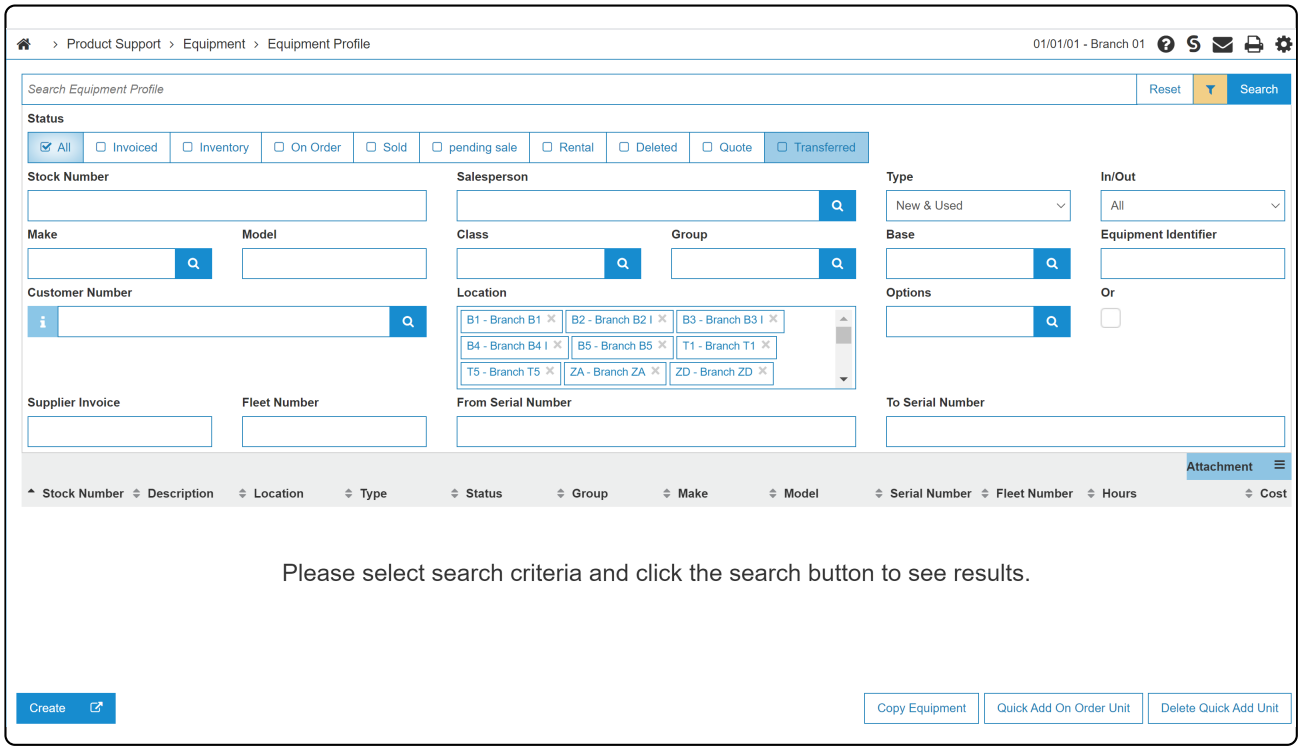
Equipment Profile Listing Screen



Topics in this section include:

- Searching Equipment Profiles
- Screen Description

Searching Equipment Profiles

- Use the search bar to search keywords or if you know specific search terms such as a serial or stock number on an equipment unit.
- By default, the search bar finds your text wherever it appears—even in the middle of a word. You don't need to type the full word.
- When you type multiple words separated by spaces in the search bar, the search finds results that contain any of those. Each one is matched wherever it appears—even in the middle of another word.

You can search by equipment stock number, identifier, base, make, model, serial number, options, factory, group, customer number or fleet number, salesperson, or supplier invoice number. However, searching by location while using the search bar is not supported.

- When the Filter option is turned on (it is on by default), the search uses all of the filters together. Results must match every filter you enter—not just one.
- To keep specific search fields open or closed by default use the Sticky feature.
- If **Options** is selected, executing a search also scans **Equipment Base & Options** tab for a matching option.
- If **Options** is selected and the **Or** checkbox is selected, the IntelliDealer searches for any one of the options to match, otherwise it searches for all the options to match.

Screen Description

The status options for selecting equipment are:

Status	
Field	**Description**
All	Search through all status options for the selected unit.
Invoiced	Search Invoiced equipment status (the unit has been invoiced to a customer) for the selected unit.
Inventory	Search Inventory equipment status (the unit is physically in stock) for the selected unit.
On Order	Search On Order equipment status (the unit is on order with the supplier) for the selected unit.
Sold	Search Sold equipment status (the unit is physically in stock and has been tagged for a

	particular customer) for the selected unit.
Pre Sold	Search Pre Sold equipment status (the unit is on order with the supplier for a specific customer) for the selected unit.
Rental	Search Rental equipment status (the unit is a rental unit) for the selected unit.
Deleted	Search Deleted equipment status (the unit has been removed) for the selected unit.
Quote	Search Quote equipment status (the unit is being priced for a customer) for the selected unit.
Transferred	Search Transferred equipment status (the unit has been transferred to another dealer) for the selected unit.

The search fields on the **Equipment Listing** screen are:

Field	Description
Stock Number	Search for a stock number by entering a stock number.
Make/Model	Search for a stock number by entering a make/model code.
Customer Number	Search for a stock number by entering a customer number.
Supplier Invoice	Search for a stock number by entering a supplier invoice number.
Fleet Number	Search for a stock number by entering a fleet number.
Salesperson	Search for a stock number by entering a salesperson.
Class	Search for a stock number by entering a class code.
Group	Search for a stock number by entering a group code.

Location	Search for a stock number by entering a location. The behavior of this search field is affected by the Access Units in Other Divisions switch. If the switch is enabled, the dropdown is sorted by divisions. Otherwise, it is sorted by regions.
From/To Serial Numbers	Search for a stock number by entering a serial number. To search for a stock number containing the specified characters, use the **From** field alone. To search for a stock number that starts with the specified characters, use the **From** and **To** fields together. Either usage searches for all serial number types: **Machine**, **Engine**, **Transmission**, and **Sound Guard**.
Type	Search for a stock number by selecting an equipment type from the drop-down list. The **Traded Date** is the date the unit was traded from the customer. A Traded Date prevents the unit from appearing on this screen unless you choose **Traded Date** or **All** from the drop-down. Options are: • New & Used (no Traded Date) - the default selection. • New (no Traded Date) • Used (no Traded Date) • Traded Date (New & Used) • All
In/Out	Search for a stock number by selecting either in or out traffic status from the drop-down list.
Base Number	Search for a stock number by entering a base number.

Equipment Identifier	Search for the unit's specific OEM (Original Equipment Manufacturer) number.
Options	Search for a stock number by entering an equipment option. **Note:** Option numbers that contain spaces cannot be filtered directly.

The **Reset** button clears all fields of their data for the form to be refilled.

Opening the **Equipment Listing** screen from **Management Central** or **Product Support** shows search results from across all divisions.

The results fields on the **Equipment Listing** screen are:

Field	Description
Stock Number	The unit's stock number. A marks the most recent Stock Number if there are multiple instances of the same Model or Serial number.
Description	A brief description of the unit.
Location	The location where the unit is current located.
Type	The unit's type code (e.g. New or Used).
Status	The unit's current status
Group	The unit's group code.
Make/Model	The manufacturer of the unit. The model number on the unit.
Base	The unit's base number.

Serial Number	The unit's serial number.
Fleet Number	The unit's fleet number.
Hours	The amount of hours currently on the unit's hour meter.
Net Book Value	Calculated as the current cost less any writedowns credited to a writedown account (most commonly used when reevaluating inventory for year end or income tax purposes). If the equipment unit was automatically costed when invoiced, the Net Book Value appears in red.

To display additional information fields, click the ≡ to open the **Context menu** and select from these optional fields:

Extended Information	
Field	**Description**
Customer	The name of the customer who purchased or rented the unit last. When a unit is rented or invoiced the system automatically enters a name.
Yard Location	A designated physical place within the selected location.
Date Sold	The date the unit was sold.
In/Out	Whether the unit is in the location(in) or not in the location(out). The **Traffic Sub Code** appears next to the **In/Out** field value.
Model Year	The model year of the unit.
Hours 2	If available, the amount of hours currently on the second hour meter on the unit.

Click the **Copy Equipment** button to open the **Copy Equipment** screen.

Click the **Quick Add On Order Unit** button to open the **Add On Order Units** screen.

Click the **Delete Quick Add Unit** button to open the **Delete Quick Add Unit** screen.

Click the **Create** button to open a new **Equipment Profile** screen.

Click **Close** to complete your work on the **Equipment Listing** screen and return to the previous screen.
