Parts Ordering

Data Source: PURORD

Security: 821 Product Support - Parts Ordering

Revision: 2026.03

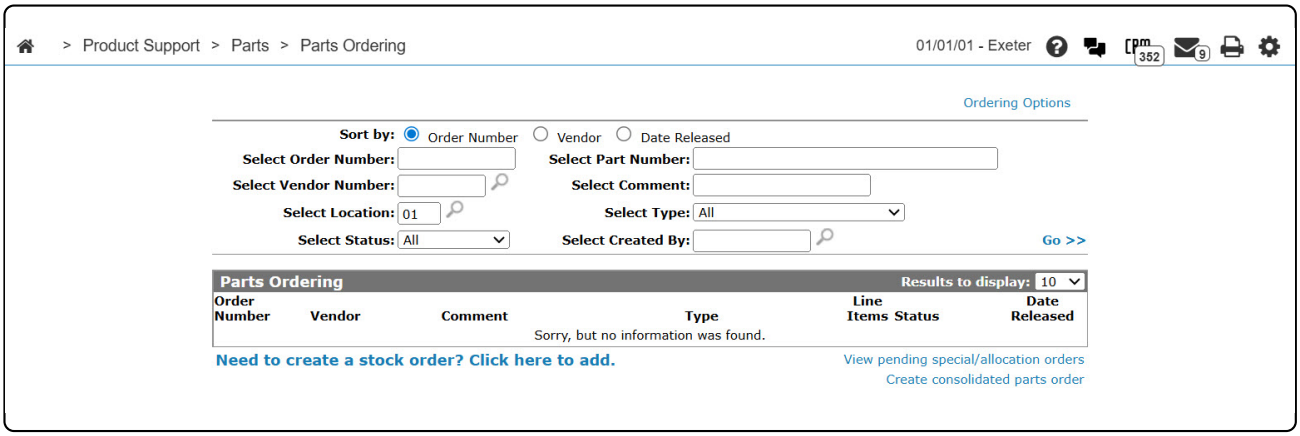
The **Parts Ordering** screen allows you to:

- view parts orders
- add parts to a part order
- create a stock order

For Accounts Payable, see Purchase Orders.

To open the **Parts Ordering** screen, navigate to **Product Support > Parts > Parts Ordering**.

Parts Ordering screen



The sorting options on the **Parts Ordering** screen are:

Sort by	
Field	**Description**
Order Number	Sort the search results by parts order number.
Vendor	Sort the search results by vendor number.
Date Released	Sort the search results by date the part order was released.

The search fields on the **Parts Ordering** screen are:

Field	Description
Select Order Number	Search for a parts order by entering an order number.
Select Vendor Number	Search for a parts order by entering a vendor number.
Select Location	Search for a parts order by entering a branch location.
Select Status	Search for a parts order by selecting an order status from the drop down list (for example on order, back ordered, or changeable).
Select	Search for a parts order by entering a part number.

Part Number	
Select Comment	Search for a parts order by entering a description of the order. For CASE dealers, this field helps with searches for orders that only reference the PSO number or sales order number on the packing slip. For the Kubota Smart Supply interface, comments in this field follow the naming convention 'SS-Supplier Code-Warehouse' (SS-KTC-10101 for example).
Select Type	Search for a part order by selecting a type of order from the drop down list.
Select Created By	Search for a part order by the person who created the order.

The fields on the **Parts Ordering** screen are:

Field	Description
Order Number	The parts order number.
Vendor	The name of the part's vendor for this order.
Comment	Any comments related to the parts order.
Type	The type of order.
Line Items	The number of line items on the selected part order.
Status	The status of the parts order: • **On Order**—the part order is currently on order, no parts can be added to the order.

	• **Back Ordered**—parts on the order have been back ordered. • **Changeable**—the parts order has not yet been placed on order and parts can be added to the order.
Date released.	The date the part order was released.

The **Type** options are:

Type Options	
Type	**Description**
SO	Stock Order
Q1	First Quarterly Order
Q2	Second Quarterly Order
Q3	Third Quarterly Order
Q4	Fourth Quarterly Order
IS	Initial Stock Order
TS	Special Order Program TS orders DO NOT perform the reclass function.
MD	Machine Down
FI	Fill In
ST	Special Terms ST orders DO NOT perform the reclass function.

Click on an order number on the **Order Number** field to open the Parts Order screen.

Click on a vendor name on the **Vendor** field to open the **Vendor Profile**screen.

Click on the **Need to create a stock order? Click here to add** link to create a stock order.

Click on the **View pending special/allocation** link to view pending special/allocation orders.

Click on the **Create consolidated parts order** link to create a consolidated parts order.

Move the cursor over the **Ordering Options** link located at the top right of the screen, and select one of these options from the drop down list:

Ordering Options	
Field	**Function**
Parts Ordering	Opens the **Parts Ordering** screen allowing you to view parts orders, add parts to a part order and create a stock order.
Order History	Opens the **PO History** screen. The information displayed depends on the scenario: • If the purchase order number corresponds to a receipted status purchase order from the purchase order system, receipt information is displayed. • If the purchase order number does not correspond to a receipted status purchase order from the purchase order system, parts purchase order summary information is displayed.
Order Correction	Opens the **Order Correction** screen allowing you to correct errors on a part order. Corrections can only be applied to the order after it has been receipted,

	updated, and moved into history.
Pending Order Receipts	Opens the Pending Order Receipts screen allowing you to search for and view pending order receipts and gives you access to edit a pending order receipt and create a new receipt. This is driven by the wireless parts inventory program.
DTF Parts Receipts	Opens the DTF Parts Receipts screen allowing you to display, delete, or post DTF parts receipt details to parts purchase orders.
OFC Reclass	Opens the OFC Reclass screen allowing you to view the reclass code for selected vendors and also allows you to create a new reclass code or automatically change OFC reclass parameters.
Automatic Stock Orders	Opens the Automatic Stock Orders Parameters screen allowing you to view, edit, and create stock order parameters.
Stock Transfer/Central Inventory	Opens theParts Transfer tab used to set the parameters for stock transfers between branches and identify central inventory branches.
Create Stock Order	Opens the Selection Criteria screen, allowing you to create stock order parameters and generate a series a reports. See Create Stock Order Parameters.
Special Terms	Opens the Special Terms - Programs tab giving the user access to Special Terms Programs and Orders.
CCN Web	Opens the Order Status tab giving the user access to the CCN Web application.

CCN Direct Ship Orders	Opens the **CCN Direct Ship Orders** screen allowing you to search for and view the CCN direct ship orders.
Download Smart Supply Orders	Starts a **Kubota Syncron Order Download** batch job and queues it into the PDF viewer. This option is only visible for users with security switch **Access Kubota Smart Supply Order Download** enabled. Requires feature 6428.
