Work in Process

Data Source: SALDET, WOLAB

Revision: 2026.01

Use the **Work in Process** tab to search for and view work in process. Totals from signed off segments are also included.

To open the **Work in Process** tab, navigate to **Product Support > Service > Analysis Reports**, then click the **Work In Process** tab.

Or navigate to**Management Central > Service > Work In Process**.

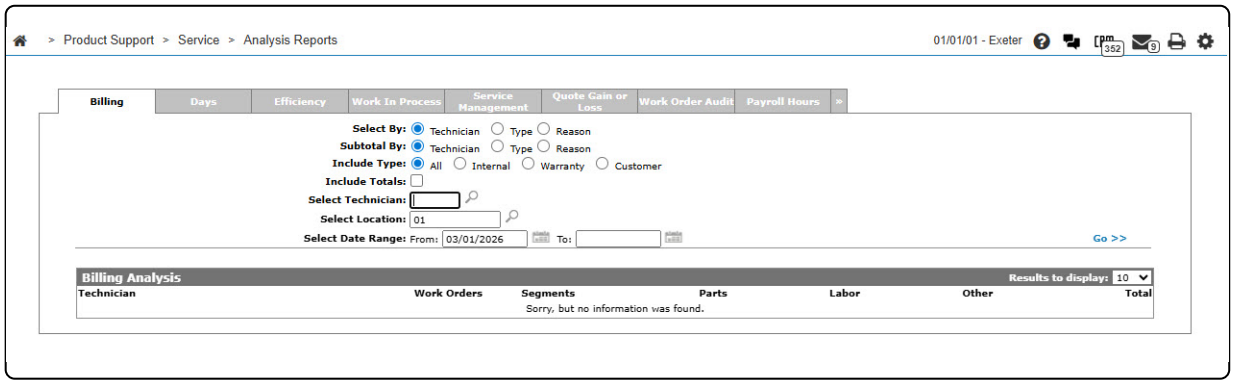
Topics in this section are:

- Viewing Work in Process Details
- Creating a Work in Process Report
- Screen Description

Viewing Work in Process Details

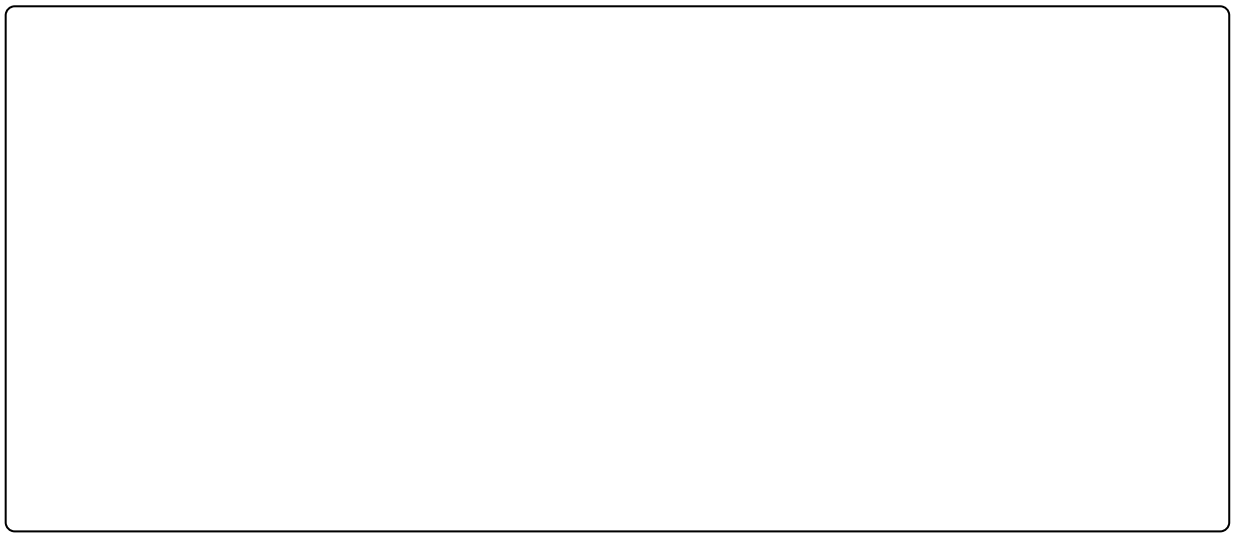
1. Navigate to **Product Support > Service > Analysis Reports**

   The Billing Analysis tab appears.



2. Click the **Work in Process** tab.

The Work in Process tab appears.



3. Fill out the fields for the data you are interested in and click **Go >>**.

The Work In Process tab refreshes listing the generated search results.

4. Click a **Total**.

The Open Work Orders screen appears.

5. Move your cursor over an a **Order #** and select **Dollars** from the pop-up menu.

The pop-up menu

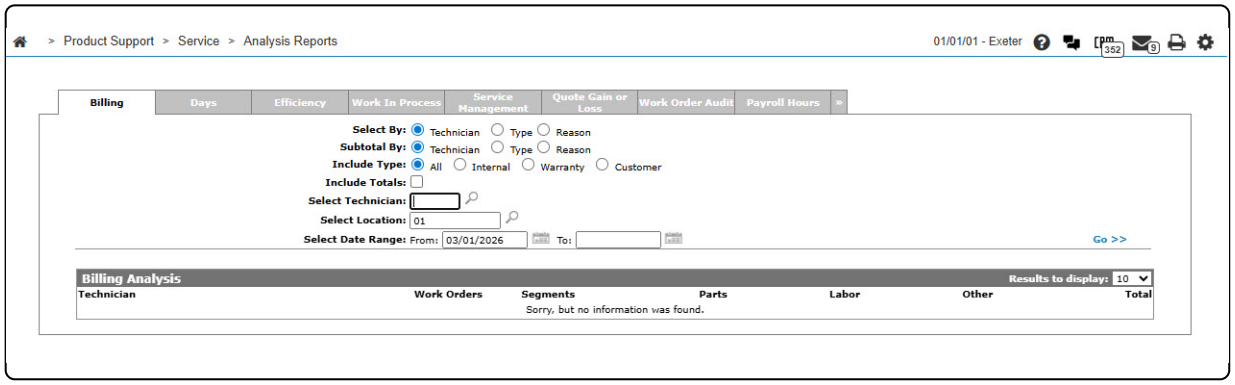
The WIP Details screen appears.

Use the **WIP Details** screen to drill further into the details of the selected work order.

Creating a Work in Process Report

1. Navigate to **Product Support > Service > Analysis Reports**.

   The Billing Analysis tab appears.

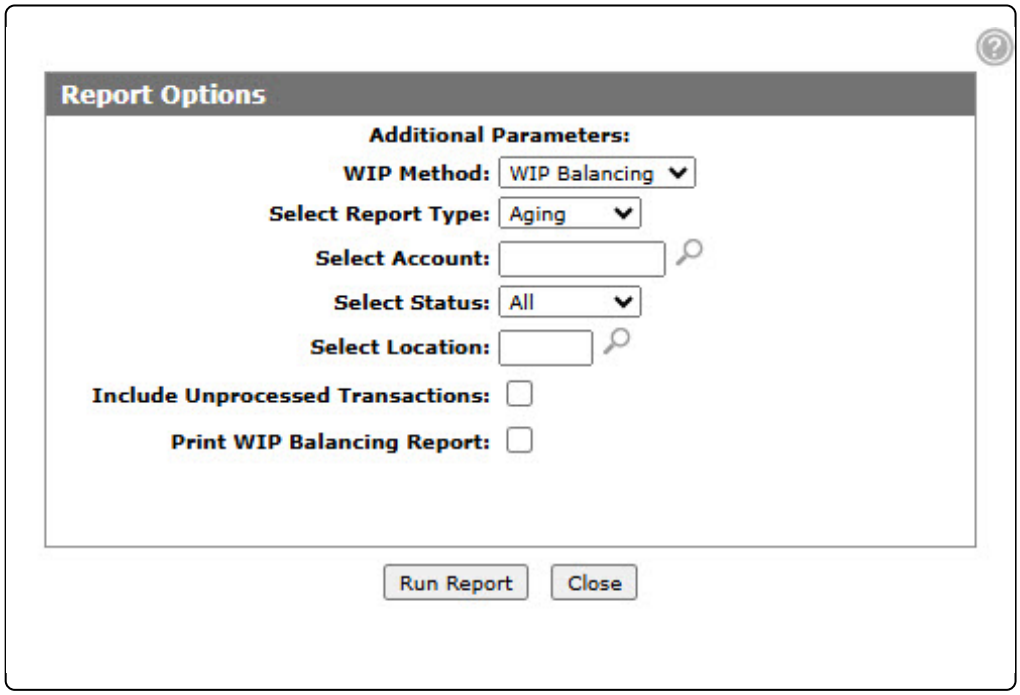


2. Click the **Work in Process** tab.

   The Work in Process tab appears.

3. Click **Create a Work in Process Report**.

The Report Options screen appears.



4. Fill out the appropriate report parameters.
5. Click the **Run Report** button to generate the WIP report.

   These reports are produced according to the report parameters selected on the **Additional Parameters** section on the **Report Options** screen:

WPSWIP2A	Aged Work in Process

WPSWIP2B	Work in Process - Summary
WPSWIP2C	WIP Balancing Report

Screen Description

Search fields on the **Work in Process** tab are:

Field	Description
WIP Method	Select which method to use to analyze the WIP data. • **WIP Balancing**—lists outstanding work orders by the dollar amount that was posted to the general ledger. When **WIP Balancing** is selected, the system calculates the current work in process based on the WIP code (**S** or **I**) that is on the actual record in the **SALDET** or **WOLAB** files. • **List Price**—lists outstanding work orders by list price. When **List Price** is selected, the system defaults the WIP code on each order to **S**, so that the **LLPRC** and **SDPRC** values are used to calculate the labor and parts costs accordingly. • **Estimated Cost**—lists outstanding work orders by cost. When **Estimated Cost** is selected, the system defaults the WIP code on each order to **I**, so that the price is calculated using the average cost for parts (**SDAVN**) and average cost for labor (**LLAVN**).
Select Account	Search for work in process by entering a specific WIP account number.
Select Status	Search for work in process by selecting a status from the drop down list (e.g. all, customer, warranty, or internal).
Select Location	Search for work in process by entering a location.
Include	Select the checkbox to include any transactions

Unprocessed Transactions	which have not yet been processed/billed.

Fields on the **Work In Process** tab are:

Field	Description
Aging Period	The aging period indicates the amount of days the work order has been open or a work in process: • **Current**—the work order has a started date of 0 or less than 30. • **31-60**—the work order has a started date between 31-60 days. • **61-90**—the work order has a started date between 61-90 days. • **91-120**—the work order has a started date between 91-120 days. • **Over 120**—the work order has a started date over 120 days.
Total	Totals up all of the open work orders current values for each aging period.
%	The percentage of work orders within each aging period.

A bar graph and pie chart gives a visual representation of the work in process.

Click a **Total** to display further sales details in the **Open Work Orders** screen.

Click the **Create a Work in Process Report** link to use this data to build a work in process report.
