IntelliTech Scheduled Work Orders

Data Source: WOR

Security: 812 Product Support - Service IntelliTech

Revision: 2026.03

The **Scheduled Work Orders** screen allows you to view scheduled work orders and log on to active work orders. You can also view a technician's **Daily Time Card**.

To open the **Scheduled Work Orders** screen, navigate to **Product Support > Service > IntelliTech**.

Topics in this section include:

- MobileTech (IDMA)
- Logging on to a Work Order from IntelliTech
- Screen Description
- Daily Time Card

MobileTech (IDMA)

Work Orders are synchronized between IntelliTech and **MobileTech (IDMA)**.If a technician logs into a Work Order via **MobileTech**, the Service Call field is automatically updated to **MobileTech** in the Work Order Header. While a Work Order is active in **MobileTech**, it cannot be logged into from IntelliTech. Once the technician logs out of **MobileTech**, the Work Order becomes available again in IntelliTech.

Logging on to a Work Order from IntelliTech

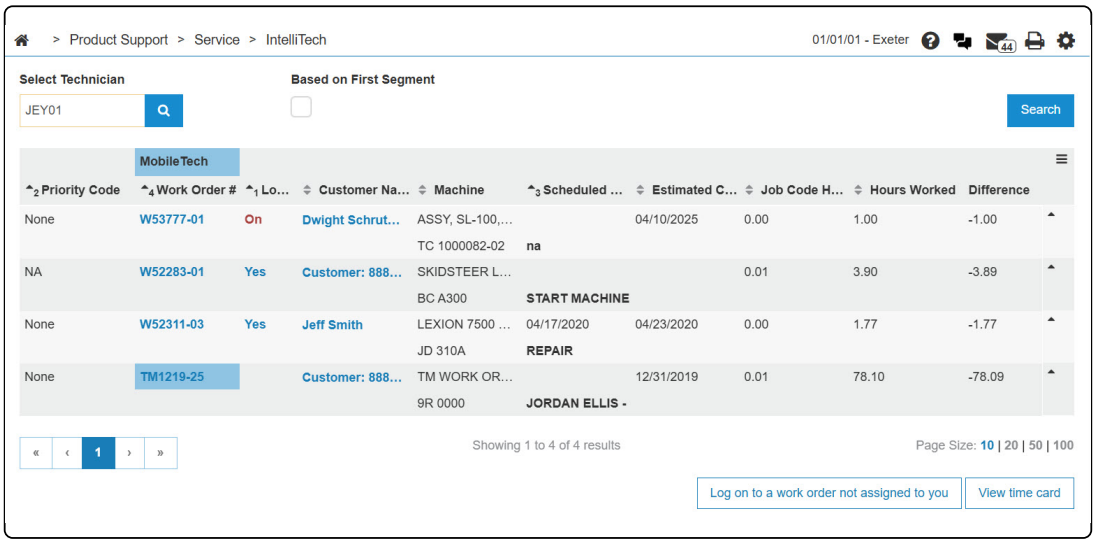
> **Note:** All buttons that appear on the *IntelliTech* **Logged On** screen are controlled by and depend on security switches or configuration.

1. Navigate to **Product Support > Service > IntelliTech**.

   The Scheduled Work Orders screen appears.

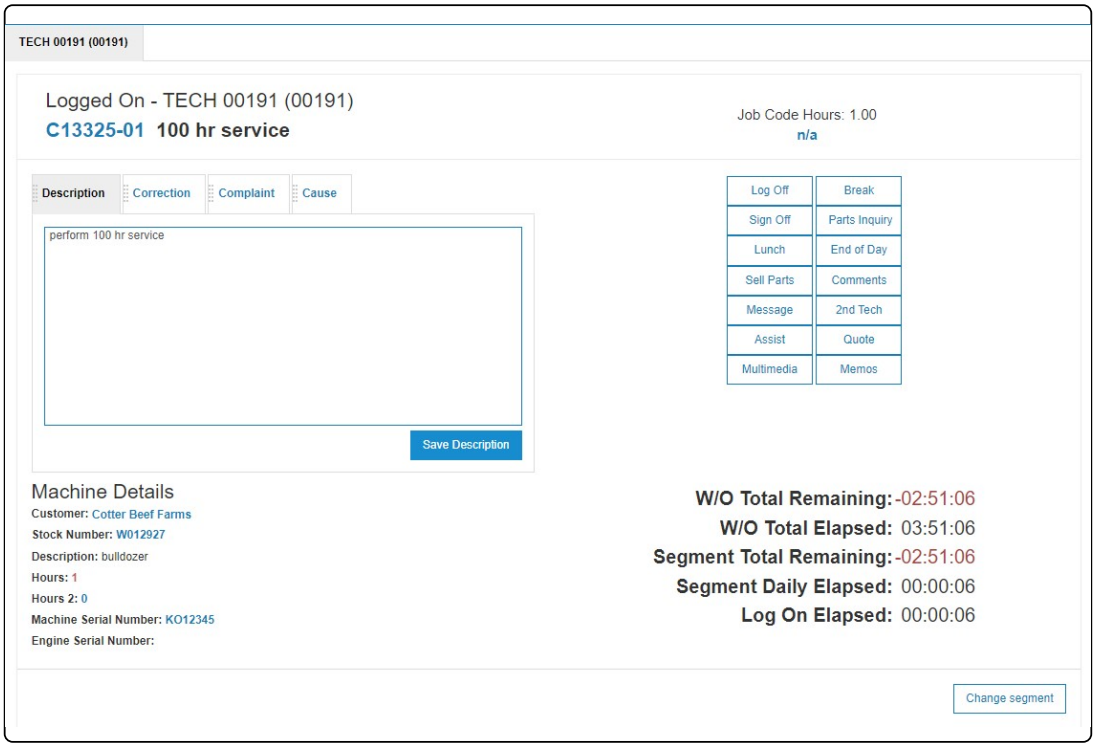
2. Check the select technician field to make sure the technician number is correct, then click **GO>>** to generate the work order search.

   Updated Scheduled Work Orders screen



3. To log on to a work order, click the **Yes** link in the **Log On** field.

   The Logged on screen appears.

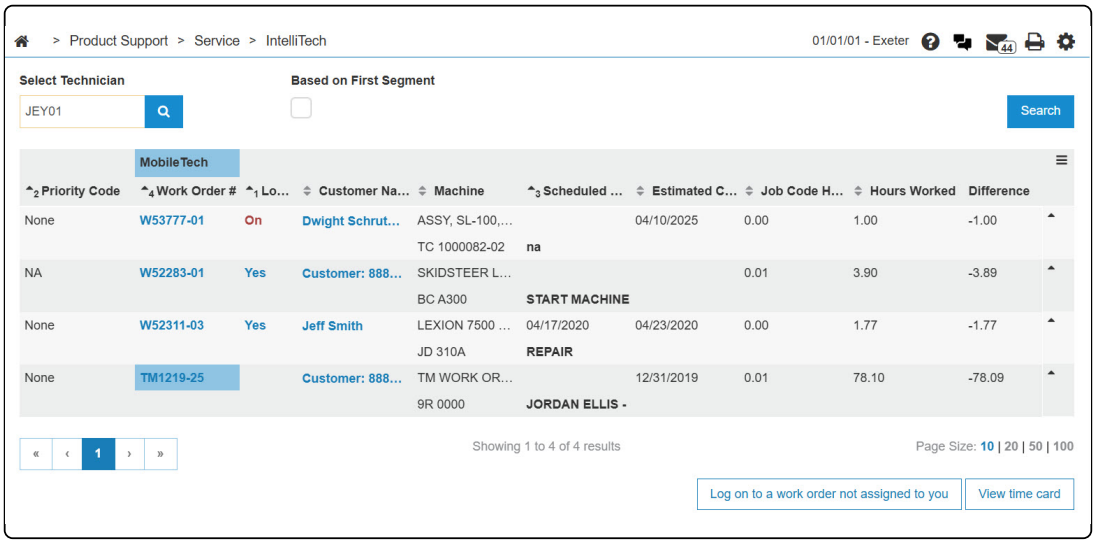


The technician's logged on time starts counting down.

Logging on to a Work Order Not Assigned to You in IntelliTech

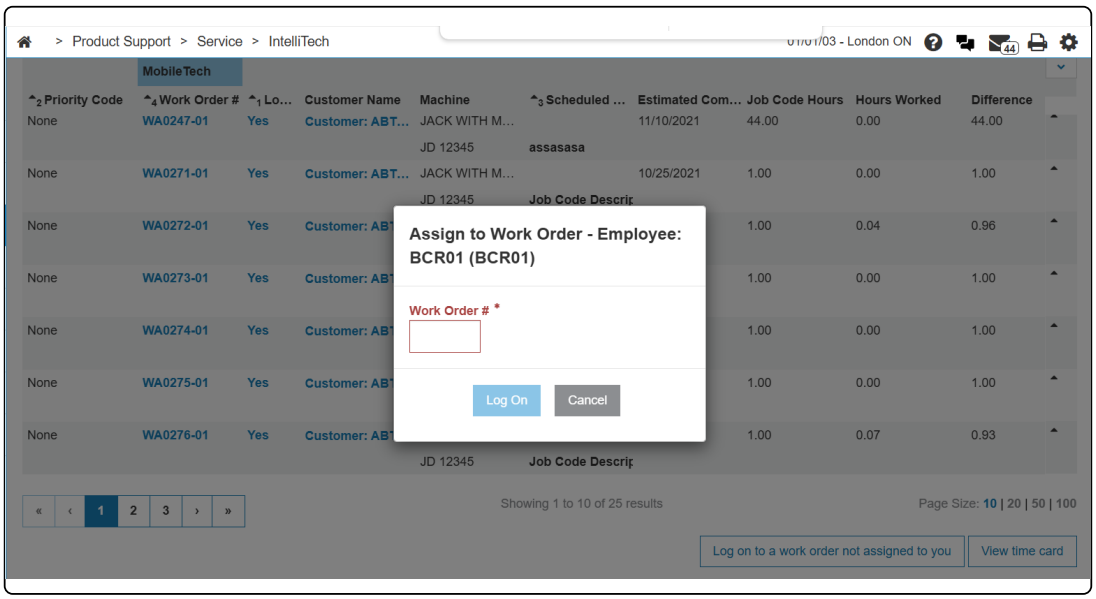
1. On the **Scheduled Work Orders** screen, enter a technician's number into the **Select Technician** field, then click **GO>>** to generate the technician search.

Updated Scheduled Work Orders screen



2. Click the **Log on to a work order not assigned to you** link.

Assign to Work Order window opens



3. Enter a work order number in the **Work Order #** field.
4. Click **Log On** to assign yourself to the selected work order.

   The Logged on screen for the selected work order appears.

Screen Description

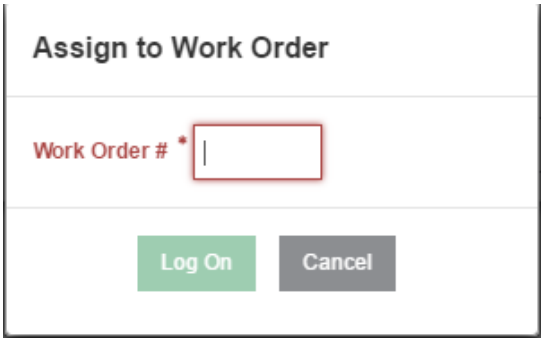
The fields on the **Scheduled Work Orders** screen are:

Field	Description
Priority Code	The priority of this work order/segment in relation to the other work order/segments for the selected technician, as displayed on the **Scheduled Work Orders** screen. See Work Order: Segments.
Work Order	The **work order** number (including segment number if the **Based on First Segment** checkbox is left unselected). Checking the **Based on First Segment** checkbox displays work orders where the searched technician is logged to the first segment of a multiple segment work order.
Log On	Indicates whether the technician is: • **On**—Logged on to (working on) the work order segment. • **Yes**—Can be logged on to the work order segment by

	clicking the hyperlink. • **Blank**—The work order segment is currently active in **MobileTech (IDMA)** and cannot be accessed from IntelliTech. If the Log On information is hyperlinked, you can access additional screens.
Customer Name	Displays the customer's name and also lists a bit of the **Description** field from the work order segment in the row underneath.
Machine	The unit that is being serviced. The unit's **Make**, **Model**, and **Year** codes are listed in the row underneath.
Scheduled Start Date	The date on which the service for the selected segment is scheduled to start.
Estimated Completion Date	The estimated completion date of the work order segment.
Job Code Hours	The estimated or job code labor hours needed to complete the work order segment.
Hours Worked	The actual amount of hours worked to date on this segment.
Difference	The difference between estimated hours and hours worked.
Highlighted Work Orders	Highlighted **Work Orders** indicate that a technician is currently logged into the **Work Order** through **MobileTech (IDMA**). While highlighted, these **Work Orders** cannot be logged into from **IntelliTech**. Once the **MobileTech** session is closed, the highlight is removed and the **Work Order** becomes available in **IntelliTech**.
Service Call	Displays the system currently associated with the **Work Order**. If the value shows **MobileTech**, the **Work Order** is currently accessed via **MobileTech (IDMA)** and cannot be logged into from **IntelliTech**.

Click the **Log on to a work order not assigned to you** button to open a pop-up window asking for a specific work order number.

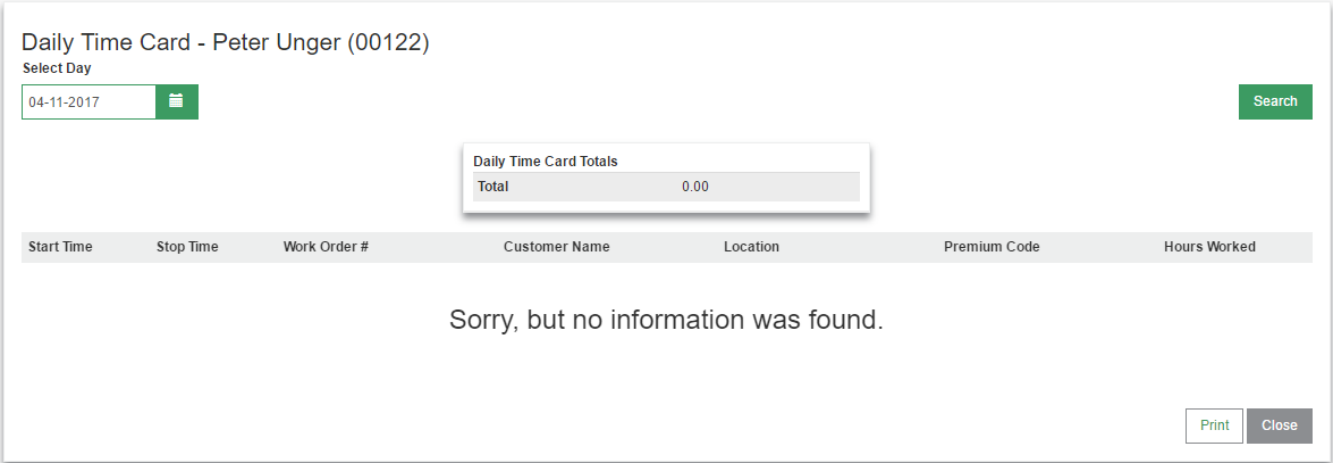
Assign to Work Order popup



Daily Time Card

The Daily Time Card screen allows you to view/edit a technician's daily time card. Click the **View time card** button to open an adjoining menu.

Daily Time Card screen



The time card information for the current date is retrieved from the time scan file (WOTTM) and for previous days the data is retrieved from billing history (MNBDD). Any unbilled labor originally scanned or logged prior to today must be billed in order to show here. Note the start and stop time for prior days show as N/A.

The fields on the **Daily Time Card** screen are:

Daily Time Card	
Field	Description
Start Time	The start time of the labor transaction.
Stop Time	The stop time of the labor transaction, which will default to the current time.

Work Order	The work order number for the selected labor transaction.
Customer Name	The name of the customer on the work order.
Location	The location.
Premium Code	The premium code that was used.
Hours Worked	The amount of hours worked on the selected labor transaction.
