Real-time Billing Queue

Security: see Security Prerequisites

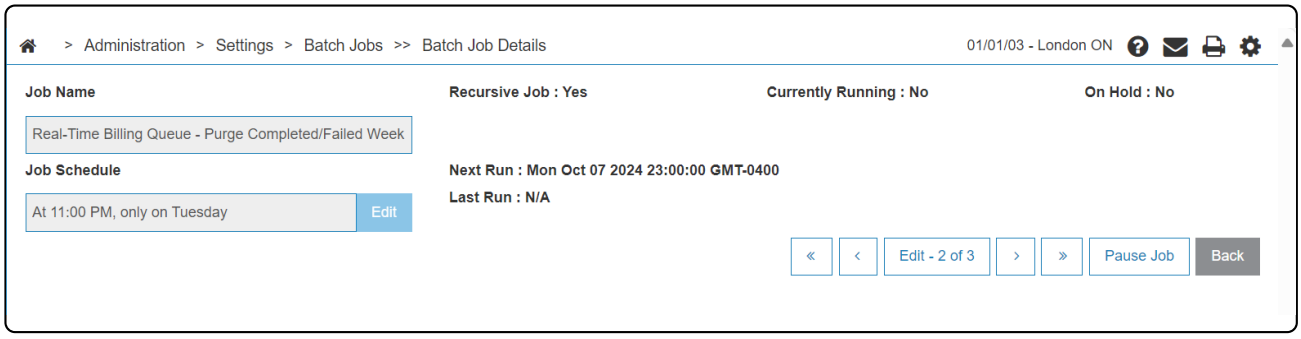
Data Source: BILLINGSCH

Revision: 2026.01

The **Real-time Billing Queue** lists the Real-time Billings that have been submitted. For details on a specific billing, click a **Reference Number** and the **Data Portal** screen opens showing the reports for that billing. Note that only successful billings are linked. Unsuccessful billings have an error message listed.

There is a trigger to purge the billing queue called **Real-Time Billing Queue - Purge Completed/Failed Weekly - Trigger**. By default it is configured to run weekly to purge any Completed or Failed jobs that are older than one month. You can modify the default by navigating to **Administration > Settings > Batch Jobs** then searching for the trigger and opening it for edit. See Job Scheduler: Batch Jobs for details.

The job details for the Billing Queue Purge trigger



To view the **Real-time Billing Queue**, navigate to **Financial Management > Real-time Billing Queue**.

  - Error Details

Security Prerequisites

You can enable real-time billing for a location, or for only a few users at a time, allowing you to control the roll out of this feature in your dealership. For instructions see **Real-time Billing System**.

Screen Description

The search fields on the **Real-time Billing Queue** screen are:

Field	Description
Reference Number	The unique number of the billing to search for.
Location	The location in which to search.
Type	The type of billings to search for.
Status	The status of billing.
From	Search for billings from this submission date.

Submitted Date	
To Submitted Date	Search for billings up to this submission date.
Show All Attempted Billings	Select this checkbox to include billings that were attempted but did were not successfully submitted.

The fields on the **Real-time Billing Queue** screen are:

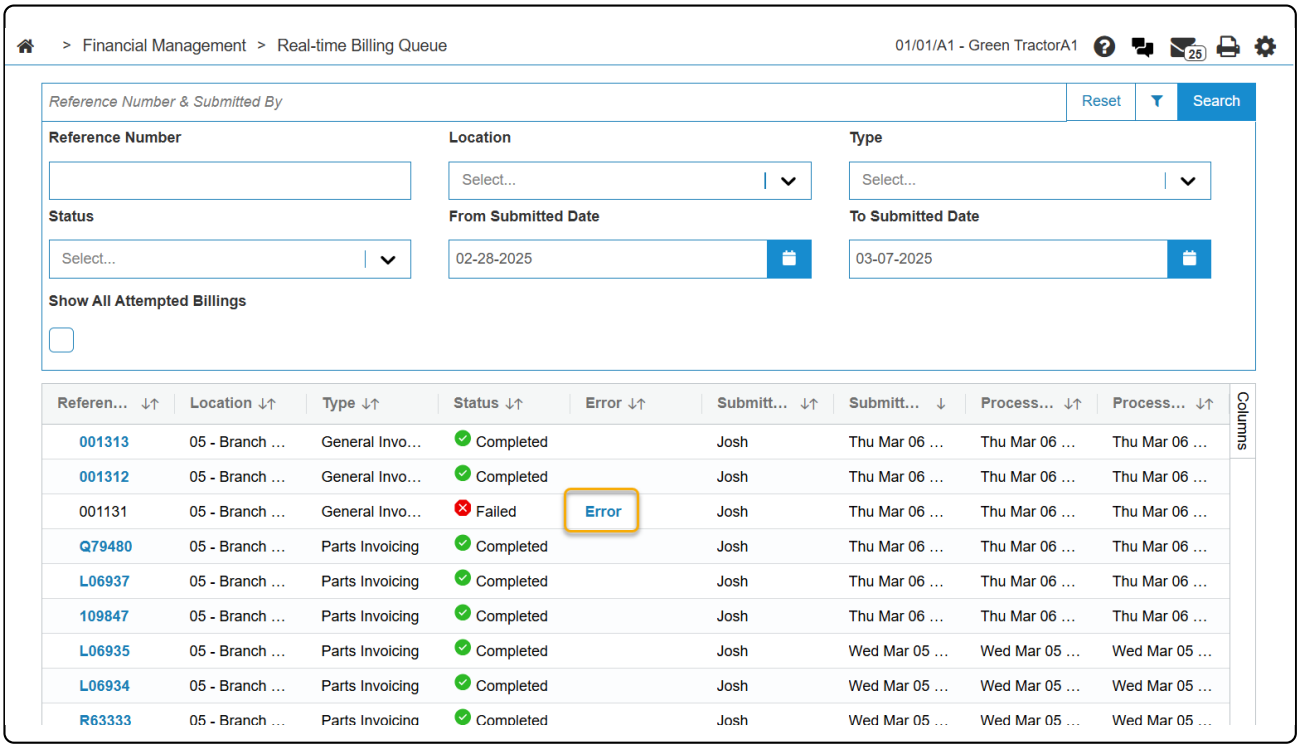
Field	Description
Reference Number	A number uniquely identifying the billing. For successfully processed invoices, this number is a hyperlink that opens the Data Portal displaying the related reports. For Rental invoices, hover over the hyper link and chose one of: • **Edit Contract**—opens the rental contract Details tab so you can modify it. • **View Billing Reports**—opens the **Data Portal** displaying the related reports.
Location	The location that originated the billing.
Type	The type of billing.
Status	The status of the billing. Can be one of: • **Pending**—the billing is in the queue awaiting processing. • **Processing**—the billing is currently processing. • **Failed**—the billing failed. An error message is displayed. • **Completed**—the billing completed successfully. The reference number is a link to the resulting reports.

Error	Click the link to see the error description in full. See Error Details.
Submitted By	The name of the user who submitted the billing.
Submitted Date	The date and time the billing was submitted.
Processing Start	The date and time the job starts running from the queue.
Processing End	The date and time the job ends.
Billing Date	A user-selected date for when to bill the invoice.
A/R Date	The current month end that is open.
Printer	The printer assigned to print the billing.
Invoice Printer	The invoice printer assigned to print the billing.
Billing Output	The output of this billing, as determined at the time of billing the invoice.
Print Format	The format of the print output. For details on the formats, Printing Parameters.

Error Details

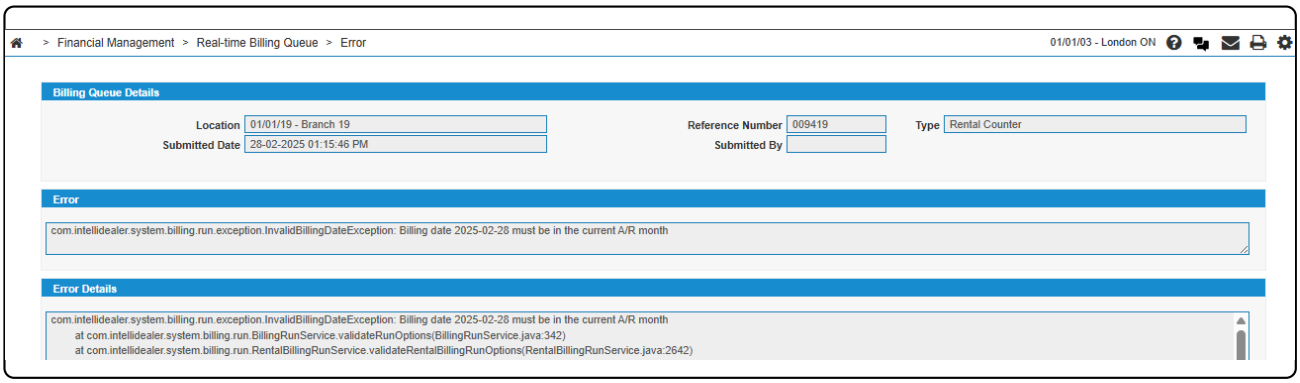
Billing runs that generate an error are listed in the **Real-time Billing Queue** list with an Error link.

Location of the Error link



Click the link to display details for the error and the full stack trace.

The Real-time Billing Queue Error details screen



If, under the **Error** column, you see the message "No Transactions Found", it simply means that there was nothing to bill in the context of the run.

Did you find this helpful? *Yes No*
